PROFILE

Full-stack SAP consultant with 15+ years in enterprise IT for tier-1 clients — Lloyds Banking Group, UBS, HSBC, UOB (Singapore), and currently Siemens (via TCS). Specialist in SAP Fiori/UI5 with production ABAP and OData delivery, actively deepening the backend stack — CDS Views, RAP, and the SAP BTP ABAP Environment — toward S/4HANA solution architecture. Six years of production ReactJS engineering in investment and retail banking before a deliberate pivot to SAP, bringing frontend depth uncommon in the Fiori ecosystem. Sole owner of the Fiori/UI5 workstream on the Siemens account (AAE region): end-to-end custom application delivery, standard app extensions, and production support.

CORE SKILLS

SAP Frontend: SAPUI5 (Freestyle), SAP Fiori, Fiori Elements, Fiori Launchpad, SAP Gateway, OData V2/V4

SAP Backend: ABAP, ABAP OO, CDS Views (associations, annotations, access control), AMDP, SQLScript; RAP on SAP BTP ABAP Environment (hands-on)

SAP Tooling: Eclipse ADT, SAP Business Application Studio, abapGit, S/4HANA

Web Engineering: JavaScript (ES6+), TypeScript, ReactJS, Redux, HTML5, CSS3, Jest, React Testing Library, micro-frontends

Quality & DevOps: Selenium/Java automation, Jenkins, Git, Splunk, Unix, Jira, Agile delivery

PROFESSIONAL EXPERIENCE

SAP Fiori/UI5 Lead Consultant | Tata Consultancy Services — Client: Siemens — *Mumbai · Apr 2025 – Present*

- Sole technical owner of the SAP Fiori/UI5 workstream for Siemens (AAE region) across CS, MM, and WM modules — from requirements through production support.
- Delivered a custom access-governance Fiori application **end to end**: form-based requests for system access, role assignment/extension, and user unlock, routed through profile-based approval workflows — replacing a manual access-management process. (SAPUI5, OData, ABAP)
- Enhanced 2 standard Fiori applications with custom business logic and extended OData services for MM/WM workflows.
- Own production support and root-cause resolution for 3 business-critical Fiori applications used by Siemens business teams.
- Serve on TCS interview panels for SAP UI5/frontend hiring across accounts; run knowledge transfer and onboarding for developers joining the engagement.

SAP UI5/Fiori Consultant | EPS Ventures — *Kuala Lumpur, Malaysia · Jan 2024 – Apr 2025*

- Extended the standard SAP Fiori MM Purchase Order Approval application (Freestyle SAPUI5) to surface additional procurement context for approvers — plant, request date, attachment submitter — accelerating approval decisions.
- Enhanced OData services in SAP Gateway to expose additional fields and custom approval logic while preserving data consistency with the SAP backend.
- Independently managed the full development lifecycle — requirement analysis, design, build, testing, and production deployment — in a client-facing onsite role in Kuala Lumpur.

Principal Consultant | Optimum Solutions — Client: UOB — *Singapore · Aug 2022 – Jan 2024*

- Production ownership of UOB's SME digital banking portal (ReactJS/Redux): incident investigation, root-cause analysis, and resolution reporting to bank stakeholders.
- Monitored application health and user behaviour via Splunk; delivered monthly performance reporting to business owners.
- Standardised support runbooks and processes, reducing recurring support errors by ~50%.

Senior Frontend Developer | TekSystems — Client: HSBC — *Pune · Mar 2021 – Aug 2022*

- Built a modular single-page application for HSBC's global client-onboarding platform in ReactJS with micro-frontend architecture, integrating multiple upstream systems and approval workflows.
- Created a reusable component library adopted across feature teams, accelerating delivery of new features.
- Integrated third-party APIs for real-time data exchange; maintained high unit-test coverage with Jest.

Frontend Developer | UBS — *Mumbai · Aug 2018 – Mar 2021*

- Developed responsive ReactJS/Redux applications for UBS's investment-banking e-trading platform, covering creation, approval, and monitoring workflows across integrated systems.
- Wrote unit tests with Jest and React Testing Library; provided development and production support for live trading applications.
- Hardened the Java-based test automation framework, improving regression stability.

Lead QA — Automation | Synechron Technology Solutions — Client: Asurion (US) — *Pune · Feb 2016 – Jul 2018*

- Designed Selenium WebDriver (Java) automation frameworks for a mobile-insurance platform serving carriers across the US, Canada, and LATAM.
- Built Jenkins pipelines for sanity testing and environment health; ran automated verification of production builds.

Senior Test Engineer | Cognizant — Client: Lloyds Banking Group — *Pune / London · Jul 2010 – Jan 2016*

- Six-year engagement on Lloyds Banking Group programmes, including 12 months onsite at the Lloyds London office (Nov 2012 – Oct 2013): test design, defect management, and mobile app testing across Android/iOS.
- Partnered with business analysts on functional coverage; led backward-compatibility testing and defect triage with cross-functional teams.

PROFESSIONAL DEVELOPMENT

- **SAP RAP (RESTful Application Programming Model)** — hands-on development on SAP BTP ABAP Environment with Eclipse ADT and abapGit (2026, in progress)
- **ABAP on S/4HANA with CDS Views** — associations, annotations, access control, OData exposure; AMDP and SQLScript (completed 2026)
- **Content creation** — YouTube channel teaching SAP UI5/Fiori from a React developer's perspective; open-source learning projects on GitHub

EDUCATION

Bachelor of Technology, Electronics & Telecommunication — Dr. Babasaheb Ambedkar Technological University, Lonere, Maharashtra, India (2010)
