Recognized for collaborating with stakeholders, resolving complex technical challenges, and leading cross-functional teams to successful project outcomes. Actively seeking global opportunities to architect innovative SAP solutions and drive digital transformation initiatives.

Core Skills:

- **SAP Technologies:** SAP Fiori (UI5), Core ABAP, OData,
- **Frontend:** JavaScript (ES6+), ReactJS, TypeScript, HTML5, CSS3
- **DevOps & Monitoring:** Splunk, Firebase, Jenkins, Unix
- **Tools & Platforms:** Git, Jira, Agile, Android/iOS Debugging
- **Soft Skills:** Team Leadership, Stakeholder Communication, Agile Delivery

Project Details:

Tech Lead Enterprise Solutions (SAP) | TCS – Mumbai | Apr 2025 – Present

Skills: JavaScript, SAP Fiori (UI5), Core ABAP, oData, OOPS ABAP

Project Description: A custom SAP Fiori implementation integrating CS, MM, and WM modules to streamline enterprise identity management. The solution enabled user role creation, tracking, approval, modification, and extension of existing roles, ensuring secure and efficient access governance across business processes.

Key responsibilities & contributions:

- Developed and customized SAP Fiori/UI5 applications aligned with business requirements across CS, MM, and WM modules.
- Ensured production-ready quality through rigorous debugging, performance optimization, and adherence to SAP best practices.
- Collaborated with functional teams to integrate identity management workflows including role creation, approval, modification, and extension.
- Delivered scalable, user-friendly interfaces that improved efficiency and compliance in access governance.
- Conducted code reviews, and deployment activities, ensuring smooth transition from development to production.
- Applied modern JavaScript (ES6), OData services, and Core ABAP integration to enhance application functionality.
- Maintained documentation and knowledge transfer for long-term sustainability and support.

Senior Frontend Web Developer | EPS Ventures – Kuala Lumpur | Jan 2024 – Apr 2025

Skill: ReactJS, JavaScript, Splunk, Android SDK, XCode (iOS Local Debugging), SAP UI5

Project Description: The UOB SME Banking Application was developed to provide small and medium enterprises with secure, user-friendly digital banking services. The platform included web and mobile applications (Android/iOS), offering features such as account management, transaction tracking, and business service access. The solution integrated real-time monitoring via Splunk, performance reporting, and streamlined customer support processes to ensure reliability, compliance, and enhanced user experience for enterprise clients.

Key responsibilities & contributions:

- Led frontend development using ReactJS and JavaScript for banking applications
- Debugged mobile app issues across Android/iOS platforms
- Investigated customer issues and delivered root-cause reports
- Monitored user activity via Splunk and generated monthly performance reports
- Documented support processes, reducing errors by 50%
- Analyzed production issues via Splunk and coordinated with business teams
- Managed a team of 4 developers and ensured high code quality
